

**HOPS.®-Roadshow – Mobile presentation system for sophisticated digital signage solutions**

HOPS.®-Roadshow guarantees you an excellent visualisation for ambitious presentations. Due to our transparency and our outstanding daylight capability your performance will be unique, awe-inspiring and revealing.

HOPS.®-Roadshow is a mobile plug and play solution that can be installed within seconds anywhere you want.

A fast growing number of our clients feels very satisfied by using HOPS.®-Roadshow on fairs and other events to communicate their products and services impressively to an exclusive audience. Many of our purchasers could increase their turnover by delivering a performance that was standing out of the crowd. Due to the compact structural shape and the fuss-free installation HOPS.®-Roadshow is the perfect backing for sales representatives and rentings.

### Technical description

HOPS.®-Roadshow consists of an interactive holographic rear projection screen, a short distance projector and a foldable rack. The projection screen is to be mounted easily onto the foldable rack. Afterwards the projector can be simply placed and adjusted behind the screen. Finally the touch application has to be configured by an easy to use touch driver. The whole system can easily be plugged onto your PC or laptop for perfect interactive communication to your audience.

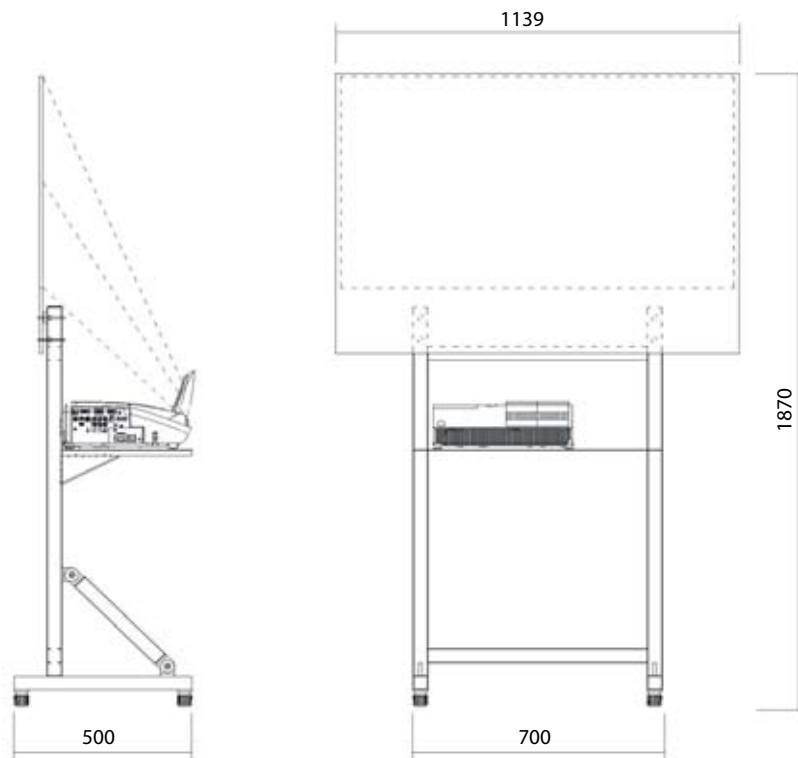

In order to transport HOPS.®-Roadshow all items can be stored in two flight cases, which are included. It is recommended to set up and transport the system by two persons.
